

GOLDEN CONTRACTORS

In an age of innovative design and elaborate lighting, electricians are more than workers, they are craftsmen of history, continually installing the latest technologies that are paving the way for a greener future. This year, a new division of awards was added to capture this group of visionary craftsmen, the Excellence in Efficient Energy and Green Construction.

Awards of Excellence in Electrical Construction are selectively awarded each year at the Annual IEC National Convention and Electric Expo in the following categories; Residential, Commercial, Industrial, Low-Voltage/Limited Energy Construction, and Efficient Energy/Green Construction. All award nominations were thoroughly reviewed by a panel of judges in the areas of design, implementation, obstacles overcome, creativity and safety.

Cummings Electrical Lights Up Electrical Construction

DESIGN: The Buffalo Thunder Resort & Casino in Santa Fe is the largest destination resort in New Mexico. Cummings Electrical was involved with the projects total design, control and budgeting. The project was not only completed within budget, but a full 10 weeks ahead of schedule.

SAFETY: Cummings Electrical and its contractors completed the 24-month project without zero lost accident time.

THE NUTS & BOLTS: The new facility features 395 sleeping rooms, a 2,500 square foot Governors suite, a 1,000 square foot honeymoon suite, 66,000 square feet of meeting space that includes a 1,200 seat ballroom as well as an 80,000 square foot Las Vegas-style casino.
